Github · Website

Naricon – *Icon changer application targeting IOS*

Freelance
React Native, Strapi

Website · App Store

GrapheneX – *Automated System Hardening Framework*

The grapheneX project aims to provide a framework for securing the system with hardening commands automatically. It's designed for the end-user as well as the Linux and Windows developers due to the interface options. (interactive shell/web interface) In addition to that, grapheneX can be used to secure a web server/application.

Python, Flask, Javascript, Jquery

Github

CoolModFiles.com – *A web player that plays some cool MOD files randomly* 🎶

CoolModFiles is a web player that will introduce you to the most obscure and legendary tracks hosted on the internet's biggest module archive, modarchive.org!

React, WASM

Github · [App](App)

Github CV – The App that generates CV based on your Github Profile

React, Github API v4 (Graphql)

Github · [App](App)

PyObfx – Python Obfuscator & Packer

I contributed to parsing and obfuscating import *statements.*

Python ·
